

3600

Overview

Style #3600 features a fresh new free-floating design. * As guest room or lobby seating it is available with a pedestal base steel base frame. The pedestal base is available in standard powder coat finishes. Seating comfort is provided by multiple engineered layers of high-density foam that provides years of use in contact seating. The loose look back cushion is sewn into the full back. This provides extra comfort without the potential loss of the separate cushion.

The flowing lines of the arms and back can be upholstered in matching or contrasting fabrics, thus giving designers multiple options for guest room or public spaces.

*Design patent in process.
