

3002

## Specs

Width: 17"

Depth: 20.5"

Back Height: 34"

Seat Height: 18.5"

C.O.M. Yardage: 1

## Overview

A classic lattice back chair preferred by 5-star hotels for dining and banquet facilities as well as country clubs. The sewn seat cushion features 2 1/4" of luxurious foam for extended comfort.

The all welded aluminum frame is fabricated from one inch round, 1/10th wall (25mm/2.4mm) extruded tubing with bamboo ringing design. The frame is structurally reinforced to insure many years of contract service. The back lattice Chinese Chippendale design is created from individually welded and polished aluminum spindles 1/2" round (12mm). The legs are fitted with rubber cushioned triple umbrella clip glides and plated steel base for years of maintenance free use on all floor surfaces. A formed metal "seat pan" beneath the seat cushion prevents indentations in the fabric when chairs are stacked for movement or storage. All foam cushioning meets the flammability standards of California Bulletin 117.
