

W100 Series Table Tops

Specs

See Table Base Sizing Chart for appropriate top-to-base sizing considerations.

Overview

Solid wood tops are produced from edge glued lumber strips in white hard maple. The edges are shaped as shown and tops are finished to produce an alcohol and chemical resistant surface with catalyzed varnish. All solid wood tops are 1 3/4" thick.

All wood tops should be cleaned only with a soft non-abrasive wiping cloth, and in rare instances a soft soap mild solution may be used.

Tops are normally bulk packed on skids and can be shipped in individual packages at additional cost. All tops when ordered as a complete table (top and base) are predrilled to facilitate easy assembly. Required screws are supplied in shipment with table tops. Consult Standard Wood Finishes page for selection.

Features

- HBN Half Bullnose
- FBN Full Bullnose
- OGEE Ogee
