Overview

The Caroline Series, style 1310, is the ideal solution for reception rooms, conference centers, seminar use and other occasional seating requirements. The contoured foam padded seat and back offers generous seating comfort. The back is finished without any exposed fasteners. Seats and backs are available in your choice of upholstery or C.O.M. The frame is fabricated from 1/2" round, 16 gauge (12mm/1.6mm) welded steel tubing with plated chrome finish. Additional steel cross supports are welded beneath the seat for additional strength and seating support in contract use. The black nylon glides double as stacking spacers.

The Kevin series, style 1300 will inter stack with the side chair, Caroline series, style 1310.
