## Overview

Model #2046 is a selection from the Ultimate Series.

Ultimate series features all-day comfort in a banquet and seminar seating from the first minute one sits down through a long meeting or event. The seat is cushioned with three inches (3") of luxurious molded foam with waterfall front sewing detail. Deeply contoured back panel supports the user as they relax into the flexible back support system that automatically adjusts to one's movement.
All foam cushioning meets the flammability requirements of California Technical Bulletin 117.
The powder coated 7/8" square, 16 gauge tubular steel frame provides many years of service in heavy duty daily use through frequent changes in handling and arrangement. Consult the Standard and Premium metal finishes for selection.

## Features

Stacks 8-10 high freestanding.
Powder coated Steel Frame.
Nickel plated triple umbrella rubber cushion glides to assure years of maintenance free service on all floor surfaces.
Weight activated action back.
3" thick sewn waterfall seat upholstered over rubberized webbing.
