Overview

The NuGrain series features the look of real wood finishes on a strong, welded aluminum frame for heavy duty contract use.

Designed to serve for years of service the heavy wall aluminum frame is finished with an engineered, heat transfer system that literally turns the frame surface into the look and feel of real wood without the worry of wood joints working loose over time.

The NuGrain series is the perfect seating selection for senior living, club dining, and lobby areas in medical and public facilities. The arms are secured to the frame with metal "T" nut construction to withstand heavy duty strains and use. Molded foam cushions assure years of seating comfort and support.

Features

No back design.

Stack of 4 recommended, maximum of 6.
