

2365 - Action Back

Overview

The New Standard in Stacking Chairs

The 2300 Series features the strength and durability of aluminum, designed for years of heavy duty use along with concealed action back mechanism for all day comfort. When the user moves from an upright seated, to reclined position, the responsive tilt positioning automatically adjusts the padded back according to the user's body weight. This creates a perfect seating fit and balanced posture with ideal ergonomic positioning.

Consult the Standard and Premium Metal Finishes for selection.
