* When ordering hand trucks for this series, specify model # 15-2753.

Overview

Reminiscent of the chairs often seen at official state or award banquets, the #2753 series offers elegance with practicality for contract seating. The foam padded attached box seat provides maximum comfort during those extended events. The series is available with both upholstered and exposed bamboo back treatments.

The simulated bamboo frames are manufactured from heavy wall extruded aluminum tubing with all welded construction. The chair is light in weight while still providing long life in contract service. Heavy duty molded nylon glides work on all floor surfaces.

The chairs stack up to 4 high free standing.

All foam cushioning meets the flammability standards of California Technical Bulletin 117.

Features

Internally reinforced aluminum frame with heavy duty construction features provides a light weight but heavy-duty chair for extended contract use.

Simulated bamboo style with a foam padded upholstered box seat which achieves maximum comfort during extended seating.

The chair is fitted with Heavy Duty Nylon Glides.

Stacks up to 4 high freestanding.

Consult the Standard and Premium Metal Finishes for selection.
