Specs

Width: 18" (46cm)

Depth: 23" (57cm)

Back Height: 36" (91cm)

C.O.M. Yardage: 1

Overview

The Bradley Series, Style 1900 has a square 16 gauge (1.3mm) tubular steel frame that can be finished in any of our standard powder coat finishes. The upholstery is available in heavy duty fabrics or vinyl materials. Welded stacking bars are standard.

The chair features 2" thick molded foam over a plywood, flat seat panel. The back features foam covered plywood back panels fastened to the frame without visible fasteners.

Bottom of seat features heavy duty panel. Information about flammability standards and other pertinent warranty information is listed therein.

The Bradley Series chairs are DPC's commitment to bring to the marketplace extraordinary value with prompt availability. Its competitive price sets new standards in the contract market.

All of DPC's tubular steel stacking chairs have been performance tested and meet or exceed ANSI/BIFMA standards.

Features

The frame is fitted with the exclusive triple umbrella glide, ensuring easy movement over carpeted and hard surface flooring.

The chairs can stack 12 high, freestanding; 64" from floor to top of uppermost seat

Consult the Standard and Premium metal finishes for selection.

* When ordering hand trucks for this series specify #20/1900.
