

BB 600 Butcher Block

Specs

See Table Base Sizing Chart for appropriate top-to-base sizing considerations.

Overview

Solid wood tops are produced from edge glued lumber strips in red oak or white hard maple. The edges are shaped as shown and tops are finished to produce an alcohol and chemical resistant surface with catalyzed varnish. All solid wood tops are 1 3/4" thick.

Tops are normally bulk packed on skids. All tops when ordered as a complete table (top and base) are pre-drilled to facilitate easy assembly. Required screws are supplied in shipment.

Features

All wood tops should be cleaned only with a soft non-abrasive wiping cloth, and in rare instances a soft mild soap solution may be used.
